

CineClub — Testing Report

Overview

Framework	Jest
Backend integration testing	Supertest
Frontend component testing	React Testing Library
Total test cases	25 (10 backend + 15 frontend)
Status	ALL PASSING ✓

Backend Tests

1. User Model Validation

File: `tests/unit/User.model.test.js`

#	Test Case	Expected Result
1	Should fail without username	ValidationError thrown
2	Should fail without email	ValidationError thrown
3	Should create user successfully	User saved, <code>_id</code> defined

2. `getCurrentWeek` Utility

File: `tests/unit/getCurrentWeek.test.js`

#	Test Case	Expected Result
4	Should return a number	<code>typeof result === 'number'</code>
5	Should return week between 1 and 53	<code>1 ≤ result ≤ 53</code>

3. Auth Controller (Mocked)

File: `tests/unit/auth.controller.test.js`

`User.findOne` and `bcrypt.compare` are mocked with `jest.fn()` — no real database calls.

#	Test Case	Expected Result
6	Should return 400 if user already exists	<code>res.status(400)</code>
7	Should return 400 if password is wrong	<code>res.status(400)</code>

4. Auth API

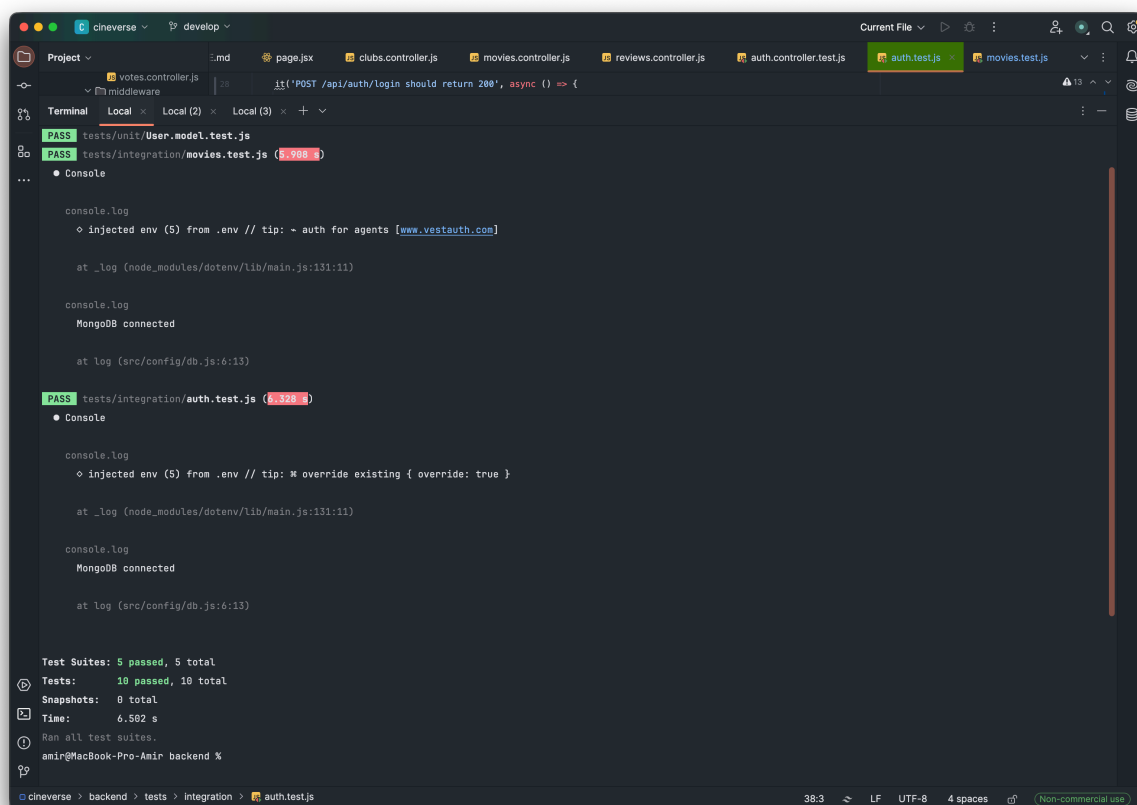

File: `tests/integration/auth.test.js`

#	Test Case	Expected Result
8	POST <code>/api/auth/register</code>	Status 201, token in response
9	POST <code>/api/auth/login</code>	Status 200, token in response

5. Movies API

File: `tests/integration/movies.test.js`

#	Test Case	Expected Result
10	GET <code>/api/movies</code>	Status 200, response is Array

Frontend Tests

6. MoviePage Component

File: `__tests__/MoviePage.test.jsx`

#	Test Case	Expected Result
11	Shows Loading... while fetching	Loading state visible
12	Renders movie title and year	Title and year in DOM
13	Renders poster with correct alt text	<code>src</code> matches poster URL
14	Displays director and rating	Both visible in DOM
15	Displays genres as tags	Genre tags rendered
16	Write a review button toggles the review form	Form shows/hides on click
17	Watched button redirects to <code>/login</code> when not authenticated	<code>window.location.href === '/login'</code>
18	Shows "Movie not found" when fetch returns null	Fallback text visible
19	Review form submits POST and adds review to the list	New review appears in DOM
20	Cast members are displayed separated by commas	Cast string rendered correctly

7. ProfilePage Component

File: `__tests__/ProfilePage.test.jsx`

#	Test Case	Expected Result
21	Shows Loading... before user data is fetched	Loading state visible
22	Renders username and bio after loading	Both visible in DOM
23	Redirects to <code>/login</code> if no token	<code>window.location.href === '/login'</code>
24	Switching to watchlist tab shows empty state	Empty state message visible
25	Logout clears token and redirects to <code>/</code>	Token removed, redirect to <code>/</code>
